Sep's Trolling Tips

STRIKE MASTER RIGGING FOR BROWN TROUT

by Doug Neal, [Almanor Fishing Adventures](#)

The idea is..... that usually the fish hit the Strike Master Dodger, both of the big Browns did, however, if the fish comes to the dodger and balks for a spit second,... the second trailer night crawler comes by right above them...so they get 2 good looks...that's why they are only seperated by 5ft.

The Strike Master Dodger gives off a big flash and attracts the fish over, and usually that's all they need..but if they hesitate for a second..here comes the plain crawler..right over their heads. FYI, trolling speed is 1.2 to 1.5 mph."

The below rigging was developed and perfected by SEP'S Pro-Staff guide Doug Neal of Almanor Fishing Adventures Guide Service. Doug used SEP'S 50/50 Strike Master Dodger, SEP'S Sure Releases & Ctacker Clip along with threaded night crawlers to land this beautiful 13.2 lb. Brown Trout.
